

Device Technologies, Inc.

Who We Are, What We Do

Spring-Fast®
Grommet Edging

Linear Electrostatic
Powder Coating

Push-Lok™
PCB Standoff

Device Technologies, Inc. (DTi) designs, manufactures, and sells Grommet Edging that eliminates burrs. This burr-free edge means wire, fiber and cable are protected against abrasion. This reduces manufacturing labor costs, shortens installation times, and cuts field repair and warranty costs. By helping to solve these basic challenges, DTi delivers real value to the bottom line of your business.

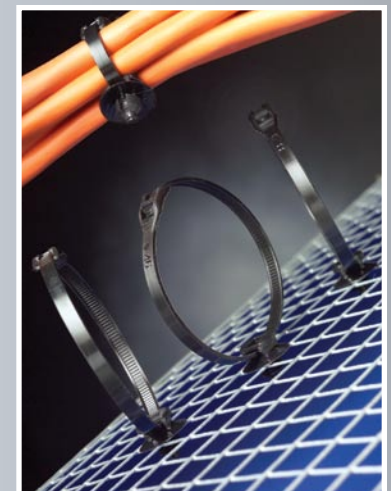

Our premiere product, the Spring-Fast® Grommet Edging, is sold to thousands of customers worldwide. Its 84 variations and extensions provide solutions to a broad range of industries and applications including Manufacturing, Medical, Telecommunications, Computers, Data Storage, Avionics, Defense, Transportation, Food Service, Gaming, HVAC & NASCAR. DTi's complete line of products includes: Spring-Fast Grommet Edging, Push-Mount Fiber and Cable Ties, Fast-Drop Bend Radius Control Modules as well as Push-Lok PCB standoffs and Snap-Tie Tubular Cable Ties.

DTi's growth in the specialty fastener industry has created a new Advanced Technology Division (ATD) within the company that specializes in fully automated, reel-to-reel linear and selective electrostatic powder coating. This innovative powder coating process is a solution applicable to cable, wire, strip, stampings and profile metal formed products encapsulated in a broad range of thermoplastic and thermoset resins.

DTi continues to invest in R & D to enhance opportunities for its product and process technologies, in compliance with ISO 9001 and AS 9100 standards. More information is available at the company's web site, www.devicetec.com or contact us by phone (800) 669-9682 or (508) 229-2000.
